INTRODUCTION

- Pollution is the introduction of contaminants into an environment that causes instability, disorder, harm or discomfort to the ecosystem.
- Pollution can take the form of chemical substances or energy, such as noise, heat, or light.
- Bangladesh is apparently now in the grip of all sorts of pollution, like air pollution, soil pollution, water pollution and others.

DIFFERENT FORMS OF POLLUTION

- AIR POLLUTION: Brick kilns, Construction sites, toxic fumes from industrial sites and vehicles.
- WATER POLLUTION: Leakage of soil pollution into water supplies, organic material decay in water supplies
- SOIL POLLUTION: Industrial wastes, harmful gases and chemicals, agricultural pesticides, fertilizers and insecticides.
- NOISE POLLUTION: Traffic, Airports, Railroads etc.
- RADIOACTIVE POLLUTION: Improper nuclear waste disposal, Uranium mining.

DIFFERENT FORMS OF POLLUTION

- **THERMAL POLLUTION:** Power plants, deforestation, increase level of carbon dioxide that trap heat.
- **LIGHT POLLUTION:** Billboards and advertising, nighttime sporting events and entertainment.
- **VISUAL POLLUTION:** Power lines, construction areas, neglected areas or objects.
- **PERSONAL POLLUTION:** Excessive smoking, drinking or drug abuse, emotional or physical abuse, Poor living conditions and habits.

AIR POLLUTION

- Restrict usage of the vehicles older than 20 years having severe exhaust fumes
- Encourage people to use Compressed Natural Gas (CNG) or Liquid Petroleum Gas (LPG), Rechargeable Battery (recently being used by US) driven vehicles, etc.
- Immediate relocate/shift the Industries (such as Tanneries, Battery, Pharmaceutical, Tobacco) away from Dhaka city suitable to initiate industrial belt or parkway
- Introduce proper outlook of the Industrial waste to prevent degrading gases
- Save the forest and promote plantation within the city limits for ecological balance;

WATER POLLUTION

- Use limited amount of pesticides so that it does not leak into the water supply.
- Pick up pet waste so that it does not get into the water supply.
- Use hazardous waste disposal depots to disposal of household products such as paint and solvents.
- Remember, polluting the land means polluting the water. Throwing away a cigarette butt on the ground near a water space means it eventually reaches a body of water

SOIL POLLUTION

- Bio-fertilizers should be used instead of chemical fertilizers since they are bio-degradable.
- Recycling paper, plastics and other materials reduces soil pollution.
- Planting trees or re-forestation helps prevent soil erosion and pollution.
- Designated pits should be used for the dumping of soil wastes .

NOISE POLLUTION

- Make your vehicles as quiet as possible. Avoid frequent use of horn and noisy exhaust.
- Roll your windows up if you want to hear loud music.
- Use electric yard tools when you can since they are quieter than gas-run models.
- Build a solid fence or wall, or plant trees and bushes to buffer noise around your home.

PERSONAL POLLUTION

- Avoid smoking, drinking and drug abuse.
- When changing vehicle oil make sure to take it to an oil recycling center.
- Don't dump anything down the storm drains. Remember somebody always lives downstream.
- Make sure that personal trash is properly disposed.
- Buy organic products to support the organic farming industry and ultimately help discourage the use of dangerous pesticides which pollute the earth's soil

CONCLUSION

Today we are under a big threat of suffering from environmental pollution and we are on the way to face the cruel destiny. As the pollution going on it will go on but what we can do, we can reduce it. And we should take immediate measure to prevent the pollution as per given suggestion above.
